# **Group Presentation**

## Education plays a vital role in reducing alcohol and other drug related risk in the workplace.

Evidence based education programs can contribute to the health and wellbeing of employees by:

- providing information about alcohol and drug related harm in the workplace;
- looking at workplace factors that may contribute to increased risk of harm; and
- providing general alcohol and other drug related health information.

#### **Keeping your organisation informed**

In most cases, the success of any workplace prevention of alcohol and drug related harm comes down to encouraging healthy attitudes and behaviours. The provision of regular, ongoing employee education plays a crucial role in supporting this change.

The Australian Drug Foundation's Inform program is a face-to-face, 60 minute interactive session delivered to groups of up to 40 people.

### **Topics covered in each session:**

WIIFM	What's In It For Me
Key information	<ul> <li>Social impacts (violence, hospitalisations, deaths, drinking and drink driving)</li> <li>Financial impacts (social and workplace)</li> </ul>
